

IP67 waterproof switching power supply.
Input 110-240VCA with single output 3W stabilized
Input / output with wires

FEATURES

- Input Voltage: 110-240Vca 50/60Hz
- Open circuit voltage: out 3,6V
- Max Current: 1,0A
- Power: 3W
- Connection: wires (20Cm)
- Enclosure: plastic
- Dimensions 57 x 40 x 26mm

WARNINGS

- 1) Do not short circuit the terminals
- 2) The device is under mains voltage, be careful
- 3) Be sure to use the correct voltage, otherwise it can cause damage to your device
- 4) Do not try to use this power supply for applications other than those for which it was designed
- 5) Do not attempt to open the product
- 6) Do not leave connected to the power line if not used
- 7) In case of anomalies, disconnect it from the mains
- 8) Keep away from children and animals
